

Protect what you value.

# McAfee Web Security Appliance

## Powerful protection for your enterprise web traffic

The Internet, one of your most indispensable business tools, is also a major conduit for malware. Web-based threats can waste valuable resources by slowing down your network and productivity. Protect your enterprise against web-borne threats—spyware, phishing, viruses, and malicious web sites—so that you can use the Internet with confidence to grow your business. Control web access to maintain employee productivity, increase network bandwidth, and enforce acceptable use policies.

### Keep Threats Off Your Network

Your Internet gateway is your first line of defense for blocking spyware, malware, and drive-by exploits. McAfee® Web Security Appliance (*formerly McAfee Secure Web Gateway*) leverages McAfee's award-winning anti-spyware and anti-virus engines to scan all downloads before they enter your network. Independent tests demonstrate that Web Security Appliance blocks malware more effectively than any other product on the market.

## SPECIFICATIONS

### Web Security Appliance model 3400

#### System configuration

- 1U server, 16.7" (W) x 1.7" (H) x 30.4" (D)
- Dual 146 GB hard drives (RAID 1)

*"McAfee Web Security Appliance wins a Clear Choice award for keeping spyware from entering our network."*

*"McAfee's Web Security Appliance 3400 provides the most complete spyware protection we've seen to date from a gateway device." —Network World*

### Keep Viruses and Spyware Out of Your Network

- Maintain business continuity by preventing web-borne threats from clogging up your network
- Block viruses and spyware at the gateway before they infect your network and desktops
- Reduce cleanup costs by preventing threats from entering your network
- Scan all downloads via HTTP or FTP
- Safeguard confidential data by thwarting exploits that use keyloggers and spyware

### Surf Safely with McAfee SiteAdvisor

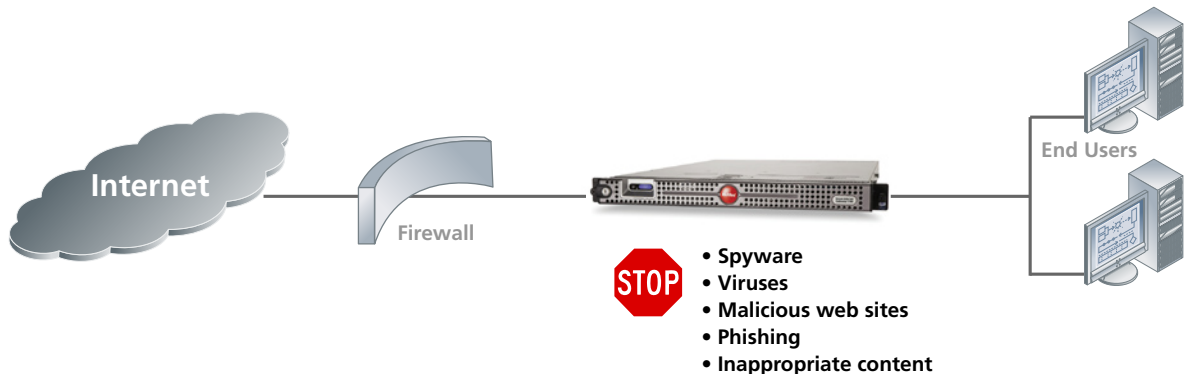

- Forewarn users about malicious web sites that harbor spyware, phishing scams, or spamming agents
- In-depth content inspection and site testing go beyond traditional URL filtering to allow, warn, or block access based on content and spamming potential
- Educate users with intuitive safety ratings and threat profiles for web sites

### Put an End to Inappropriate and Frivolous Web Surfing

- Preserve network bandwidth and improve security by blocking inappropriate or frivolous web use like gambling, shopping, and music downloads
- Enforce appropriate use policies and report on individual web-surfing behavior with our optional Web Filtering Module

### Manage with Ease

- This self-contained solution with its hard-coded operating system and built-in, web-based management tool couldn't be simpler to manage
